## Project Title: Gilmore Girls Webpage

I would like to build this site as multiple pages with very similar set ups. I also want this page to be for someone who has already seen Gilmore Girls, so there will be no need to keep any parts of the plot a secret because there won't be any spoilers. I want the watchers of the show to be able to refer to this site to see information about the show.

- home page/ premise
  - o on this page, I want to introduce the show as well as layout in some kind of grid system the different categories of the show that you can explore
- seasons
  - o include number of episodes
  - o include some key pictures for each season
- cast
  - o include both main and recurring characters
- production
- reception
- sources
